

Sequence n° 12: the refracting telescope (lunette astronomique)

ACTIVITY 1 : The refracting telescope

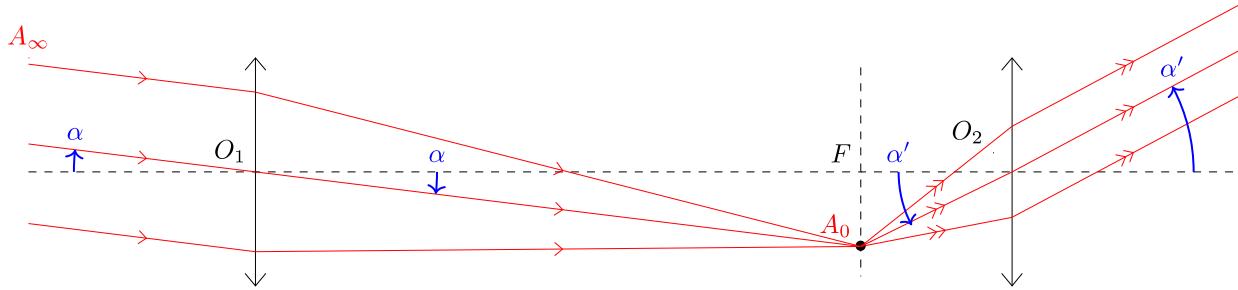

Document 1: The refracting telescope

Source: wikimedia commons

All refracting telescopes use the same principles. The combination of an objective lens and some type of eyepiece is used to gather more light than the human eye is able to collect on its own, focus it, and present the viewer with a brighter, clearer, and magnified image.

Document 2: Rays through the refracting telescope

■ Understanding the device:

Using the materials given in documents 1 and 2, label document 2 with the following:

- convergent lens (objective lens)
- convergent lens (eyepiece)
- eye
- object

Activity summary

What you must remember:

- **refracting telescope**
